Full Website Audit Report

Technical & SEO Report

Client: nicola

Website: nicolaphiriphotography.com

Prepared by: Valvanta Digital Agency

Methodology

This audit uses Lighthouse in navigation mode with mobile emulation.

Lighthouse version	13.0.1
Audit date	2026-03-07T09:29:51.231793+00:00
Categories tested	p, e, r, f, o, r, m, a, n, c, e, ,, , s, e, o
Mode	navigation
Device emulation	mobile, desktop
URLs tested	5

Execution config

Config key	Value
only_categories	performance, seo
mobile	mobile emulation + throttling
desktop	desktop preset

Standards Alignment Statement

This report aligns findings to WCAG 2.1 Level A and AA (automated checks only), Google Core Web Vitals, and Google Search Essentials.

This audit reflects automated testing only and does not constitute full legal compliance certification.

Limitations & Scope Disclaimer

This report is based on automated Lighthouse checks and reflects a point-in-time snapshot. It does not replace manual testing, user research, or full compliance reviews.

Findings should be validated in real user conditions and with assistive technologies where applicable.

Tested URLs

All URLs included in this audit run.

#	URL
1	https://nicolaphiriphotography.com/
2	https://nicolaphiriphotography.com/portfolio
3	https://nicolaphiriphotography.com/about
4	https://nicolaphiriphotography.com/services
5	https://nicolaphiriphotography.com/contact

Executive Summary

What the data shows
What the data shows
- Overall Lighthouse SEO scores are strong: average score 0.92 on both mobile and desktop across 5 URLs.
- Most audits pass consistently across all URLs: meta description, document title, link text, image alt, robots.txt, hreflang, crawlable anchors, HTTP status, and crawlability all show pass states broadly.
- The primary recurring failure is canonical: site-wide summary shows canonical failing on 4 of 5 URLs (80% fail rate) on both mobile and desktop.
- Several audits are "not applicable" across the set (indexing, structured data, tap targets, viewport, plugins, charset) and therefore are not currently contributing to failures in this dataset.

Key strengths
Key strengths
- Strong baseline SEO hygiene across the site set (titles, meta descriptions, alt text, and link text all pass for all sampled URLs).
- Crawl accessibility is good: robots.txt present, pages are crawlable, and all sampled URLs return HTTP 200.
- International targeting audit (hreflang) passes on all sampled URLs, indicating consistent configuration in the tested pages.

Primary weaknesses
Primary weaknesses
- Missing or invalid canonical on most pages (4/5 URLs fail). This can cause duplicate-content ambiguity, dilute ranking signals, and create indexation uncertainty for similar/parameterized versions of pages.
- Canonical is the top failed audit and the only consistent failure in the dataset, making it the clearest single SEO remediation target.

High level roadmap
High level roadmap
- Phase 1 (highest impact, low effort): Fix canonical across all failing URLs
- - Ensure each page declares a single, correct, fully-qualified canonical URL that matches the preferred indexable version.
- - Validate that canonicals are consistent between mobile and desktop and do not conflict with redirects or alternate URL forms.
- Phase 2 (quality control, low effort): Add automated checks to prevent regression
- - Add a build/deploy verification step to confirm canonical is present and correct on every indexable page.
- - Re-run Lighthouse across key templates (homepage, portfolio, content pages) after changes to confirm canonical failures drop to 0.

Summary metric	Mobile	Desktop
Overall score	0.94	0.94
Critical findings	0	0
High findings	4	4
Moderate findings	0	0
Advisory findings	5	5
Risk summary	Elevated risk: high-priority issues need near-term remediation.	Elevated risk: high-priority issues need near-term remediation.

SEO Site Averages - Detailed Breakdown (Mobile)

Average scores and audit outcomes across tested URLs.

Good target: average score >= 0.90 (Lighthouse pass threshold).

Metric definitions

Metric	Meaning	Good target
Average score	Mean of per-URL audit scores.	>= 0.90
Passed audits	Total audits with score >= 0.90.	Higher is better
Failed audits	Total audits with score < 0.90.	Lower is better
Not applicable	Audits that are manual/informative.	Contextual

Metric	Value
Average score	92.0%
Total URLs	5
Passed audits (total)	46
Failed audits (total)	4
Not applicable (total)	30

Audit outcomes (counts)

Most frequently failed audits

Audit ID	Fail count	Fail rate
canonical	4	0.80

Audit-level benchmarks (top 10 by fail rate)

Audit ID	Avg score	Pass	Fail	N/A	Fail rate
canonical	20.0%	1	4	0	0.80
meta-description	100.0%	5	0	0	0.00
document-title	100.0%	5	0	0	0.00
link-text	100.0%	5	0	0	0.00

image-alt	100.0%	5	0	0	0.00
robots-txt	100.0%	5	0	0	0.00
indexing	n/a	0	0	5	0.00
hreflang	100.0%	5	0	0	0.00
structured-data	n/a	0	0	5	0.00
crawlable-anchors	100.0%	5	0	0	0.00

What the data shows
What the data shows
- Mobile SEO summary: average score 1.0; passed 10; failed 0; not applicable 6 (16 total audits).
- Desktop SEO summary: average score 1.0; passed 10; failed 0; not applicable 6 (16 total audits).
- All reported applicable audits are passing, including canonical.

Key strengths
Key strengths
- Complete pass set on both mobile and desktop, including: meta description, document title, link text, image alt, robots.txt, hreflang, canonical, crawlable anchors, HTTP status code, and crawlability.

Primary weaknesses
Primary weaknesses
- No SEO audit failures are reported for this URL in the dataset.

Recommendations
Recommendations
- Maintain the current SEO configuration and use this page as the reference implementation for canonical and other passing audits when fixing other URLs.
- Re-run Lighthouse after canonical fixes on other pages to ensure this URL remains at 1.0 and no regressions are introduced.

Metric	Value
Average score	100.0%
Passed audits	10
Failed audits	0
Not applicable	6

Audit status	Tests
Passed	meta-description document-title link-text image-alt robots-txt hreflang canonical crawlable-anchors http-status-code is-crawlable
Failed	n/a
N/A	indexing structured-data tap-targets viewport plugins charset

What the data shows
What the data shows
- Mobile SEO summary: average score 0.9; passed 9; failed 1; not applicable 6 (16 total audits).
- Desktop SEO summary: average score 0.9; passed 9; failed 1; not applicable 6 (16 total audits).
- The failing audit is canonical (score 0) on both mobile and desktop; other applicable audits pass.

Key strengths
Key strengths
- Strong SEO baseline with passes for: meta description, document title, link text, image alt, robots.txt, hreflang, crawlable anchors, HTTP status code, and crawlability (mobile and desktop).

Primary weaknesses
Primary weaknesses
- Canonical fails on both mobile and desktop (score 0), reducing clarity about the preferred URL for indexing and ranking signals.

Recommendations
Recommendations
- Add or correct a single canonical link element for this URL so it resolves to the preferred, fully-qualified version of the portfolio page.
- Validate the canonical output on both mobile and desktop Lighthouse runs to ensure the canonical audit changes from fail to pass while keeping all other audits passing.

Metric	Value
Average score	90.0%
Passed audits	9
Failed audits	1
Not applicable	6

Audit status	Tests
Passed	meta-description document-title link-text image-alt robots-txt hreflang crawlable-anchors http-status-code is-crawlable
Failed	canonical
N/A	indexing structured-data tap-targets viewport plugins charset

https://nicolaphiriphotography.com/about

What the data shows
What the data shows
- Mobile SEO summary: average score 0.9; passed 9; failed 1; not applicable 6 (16 total audits).
- Desktop SEO summary: average score 0.9; passed 9; failed 1; not applicable 6 (16 total audits).
- The failing audit is canonical (score 0) on both mobile and desktop; other applicable audits pass.

Key strengths
Key strengths
- Passes consistently across key fundamentals: meta description, document title, link text, image alt, robots.txt, hreflang, crawlable anchors, HTTP status code, and crawlability.

Primary weaknesses
Primary weaknesses
- Canonical fails on both mobile and desktop (score 0).

Recommendations
Recommendations
- Implement a correct canonical link for the about page pointing to the preferred, fully-qualified URL.
- Confirm via re-test that canonical is passing on both mobile and desktop while maintaining the existing passes for titles, meta descriptions, alt text, and crawlability.

Metric	Value
Average score	90.0%
Passed audits	9
Failed audits	1
Not applicable	6

Audit status	Tests
Passed	meta-description document-title link-text image-alt robots-txt hreflang crawlable-anchors http-status-code is-crawlable
Failed	canonical
N/A	indexing structured-data tap-targets viewport plugins charset
